1 Select 'Setup' at the bottom left-hand corner.

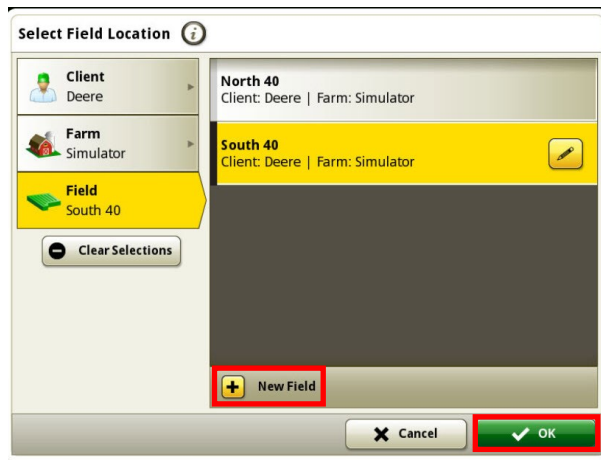

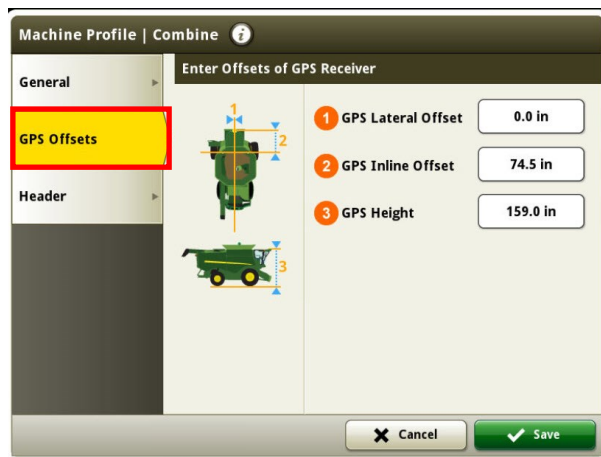

2 Select 'Location'.
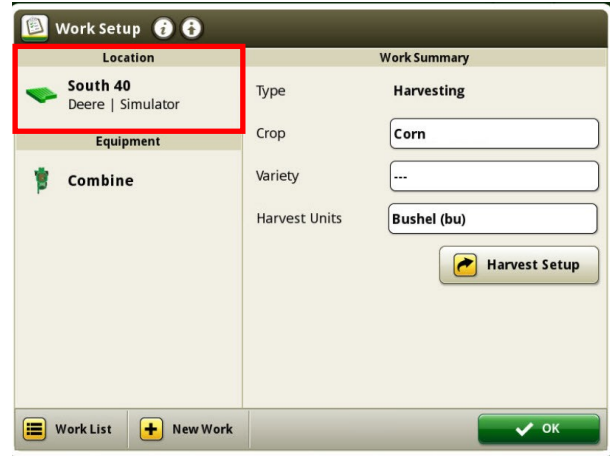

3 Select your Client, Farm, & Field, or 'New Field' to add a new location. Select 'OK'.

4 From Step 2, select 'Equipment'. Select 'Combine'.

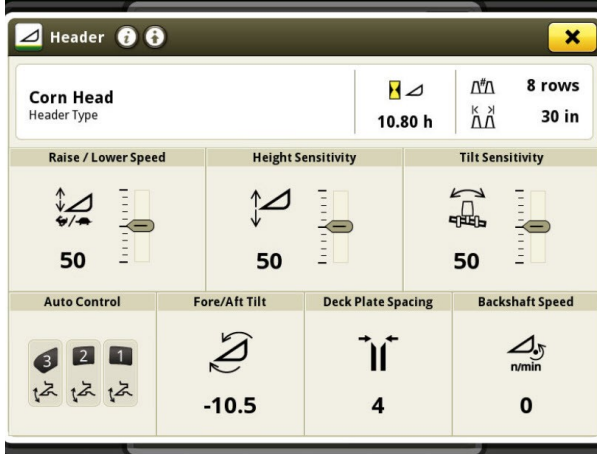

5 Enter your Machine GPS Offsets.

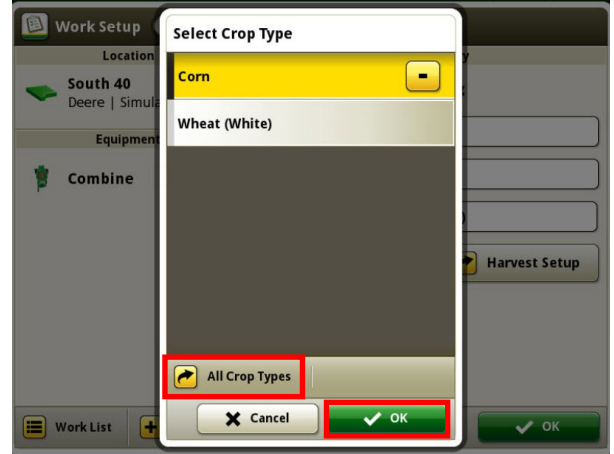

**6** Enter your Header Offsets. Select 'Save'.

7 From Step 4, select 'Header Settings'. Confirm your header type, width, and other settings.

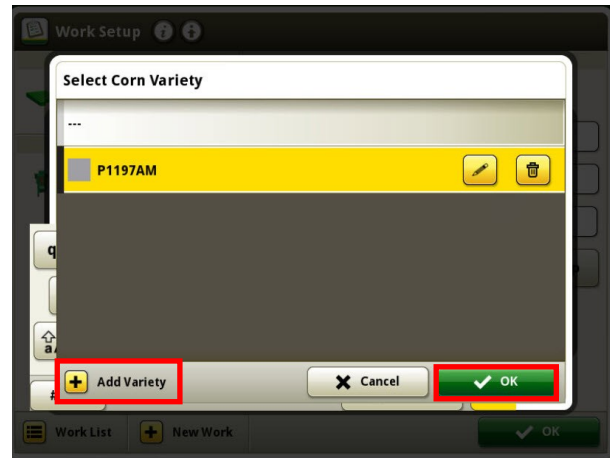

8 From Step 2, select 'Crop Type'. Select your crop, then select 'OK'.

9 From Step 2, select 'Variety'. Choose to manually enter a variety, or select Variety Locator if using a file.

10 For manual entry, choose a variety from your list or 'Add Variety'. Select 'OK'.

11 From Step 2, choose 'Harvest Setup'. Verify your crop conditions and machine settings.
