

GREENSTAR: COMBINE OFFSETS

- A** Distance from center-line of machine to GPS receiver.
NOTE: This value is typically left at 0.0 inches.
- B** Distance from non-steering (front) axle to GPS receiver.
- C** Distance from non-steering (front) axle to header connection point.
- D** Vertical distance from GPS receiver to ground.

GREENSTAR: HEADER OFFSETS

A & D

Measurements 'A' & 'D' are not required for headers, and can be left at 0.0.

B

Distance from connection point to harvesting point.
CORN HEADS: Harvesting Point = Front of Stalk Rolls
PLATFORM HEADS: Harvesting Point = Front of Cutter Bar

C

Lateral distance from center of combine to center of header.
NOTE: This value is typically left at 0.0 inches, unless using an offset header.
